Mohammad Tauhid Hossain	2023-2-60-132
Yeamin Rahman Mahid	2023-3-60-375

THE PROBLEM

- Teams form ad-hoc — group chats, hallway talk, faculty grouping
- Teammates' real skills are unknown, so teams end up unbalanced
- Finding the right supervisor is slow and opaque
- Work scatters across chats, drives, and notice boards
- Contributions go untracked; good work disappears every semester

WE ASKED STUDENTS

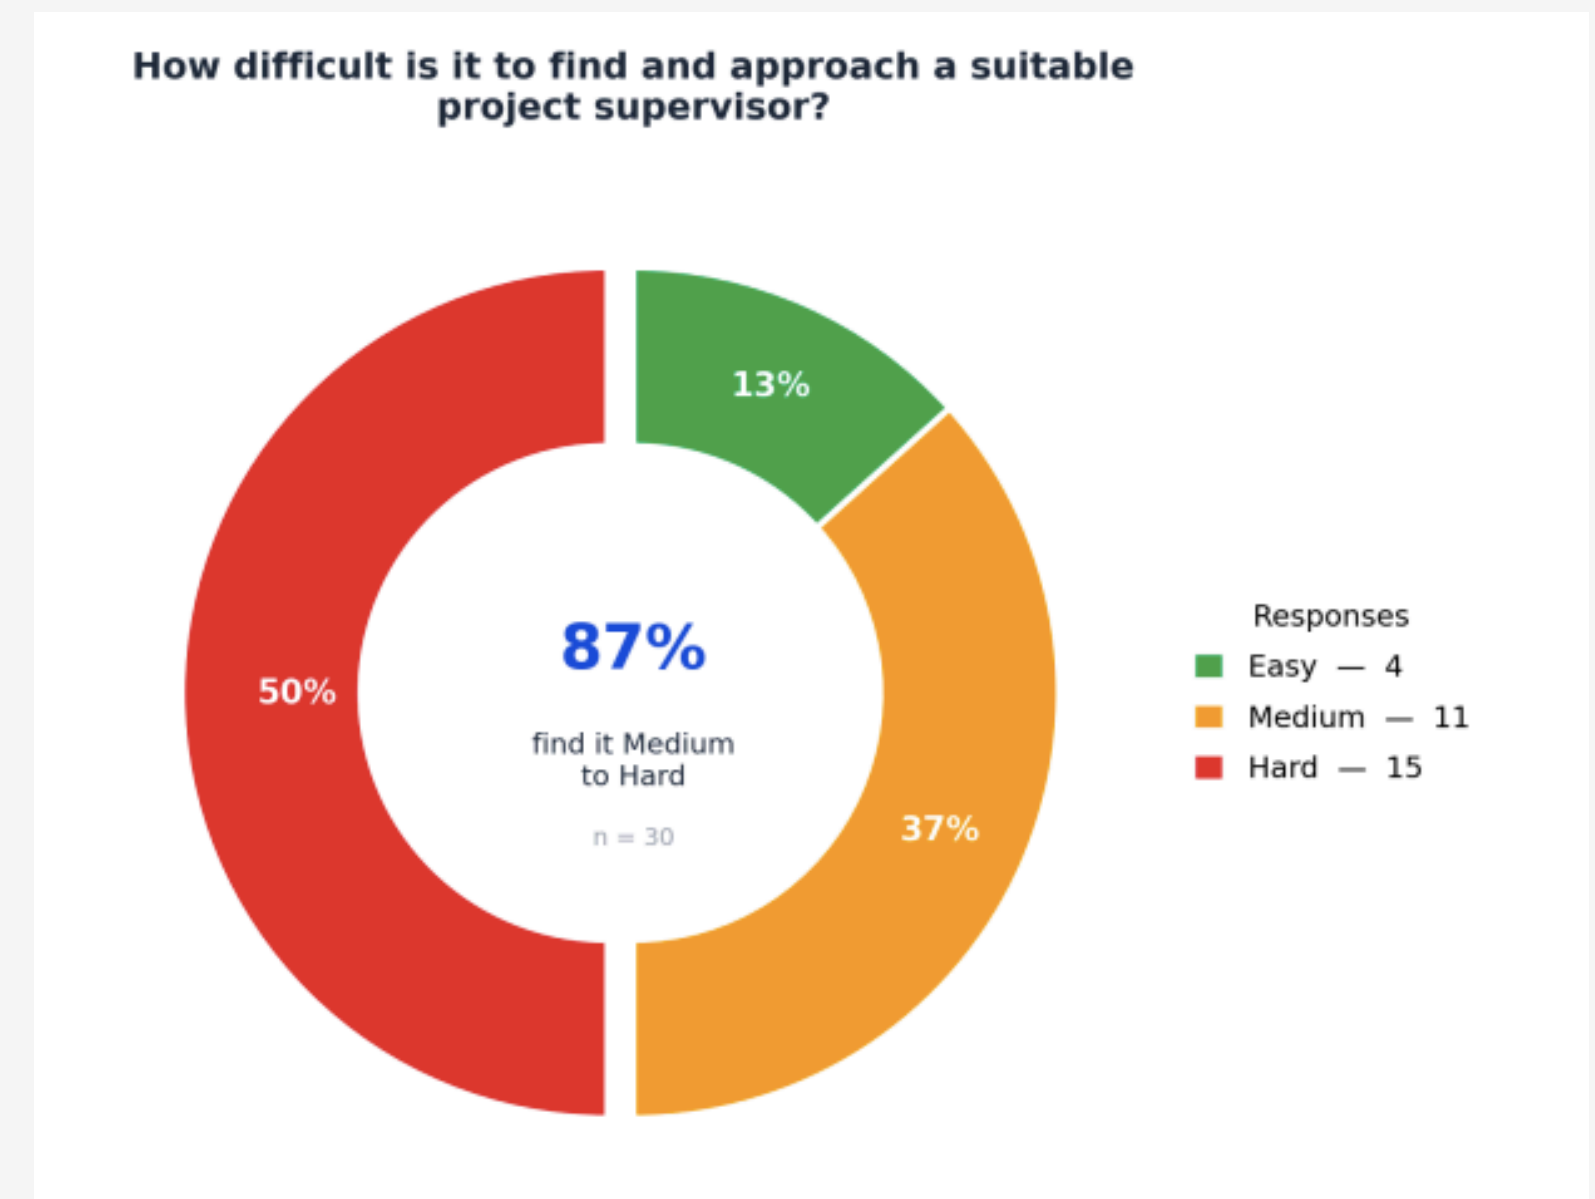

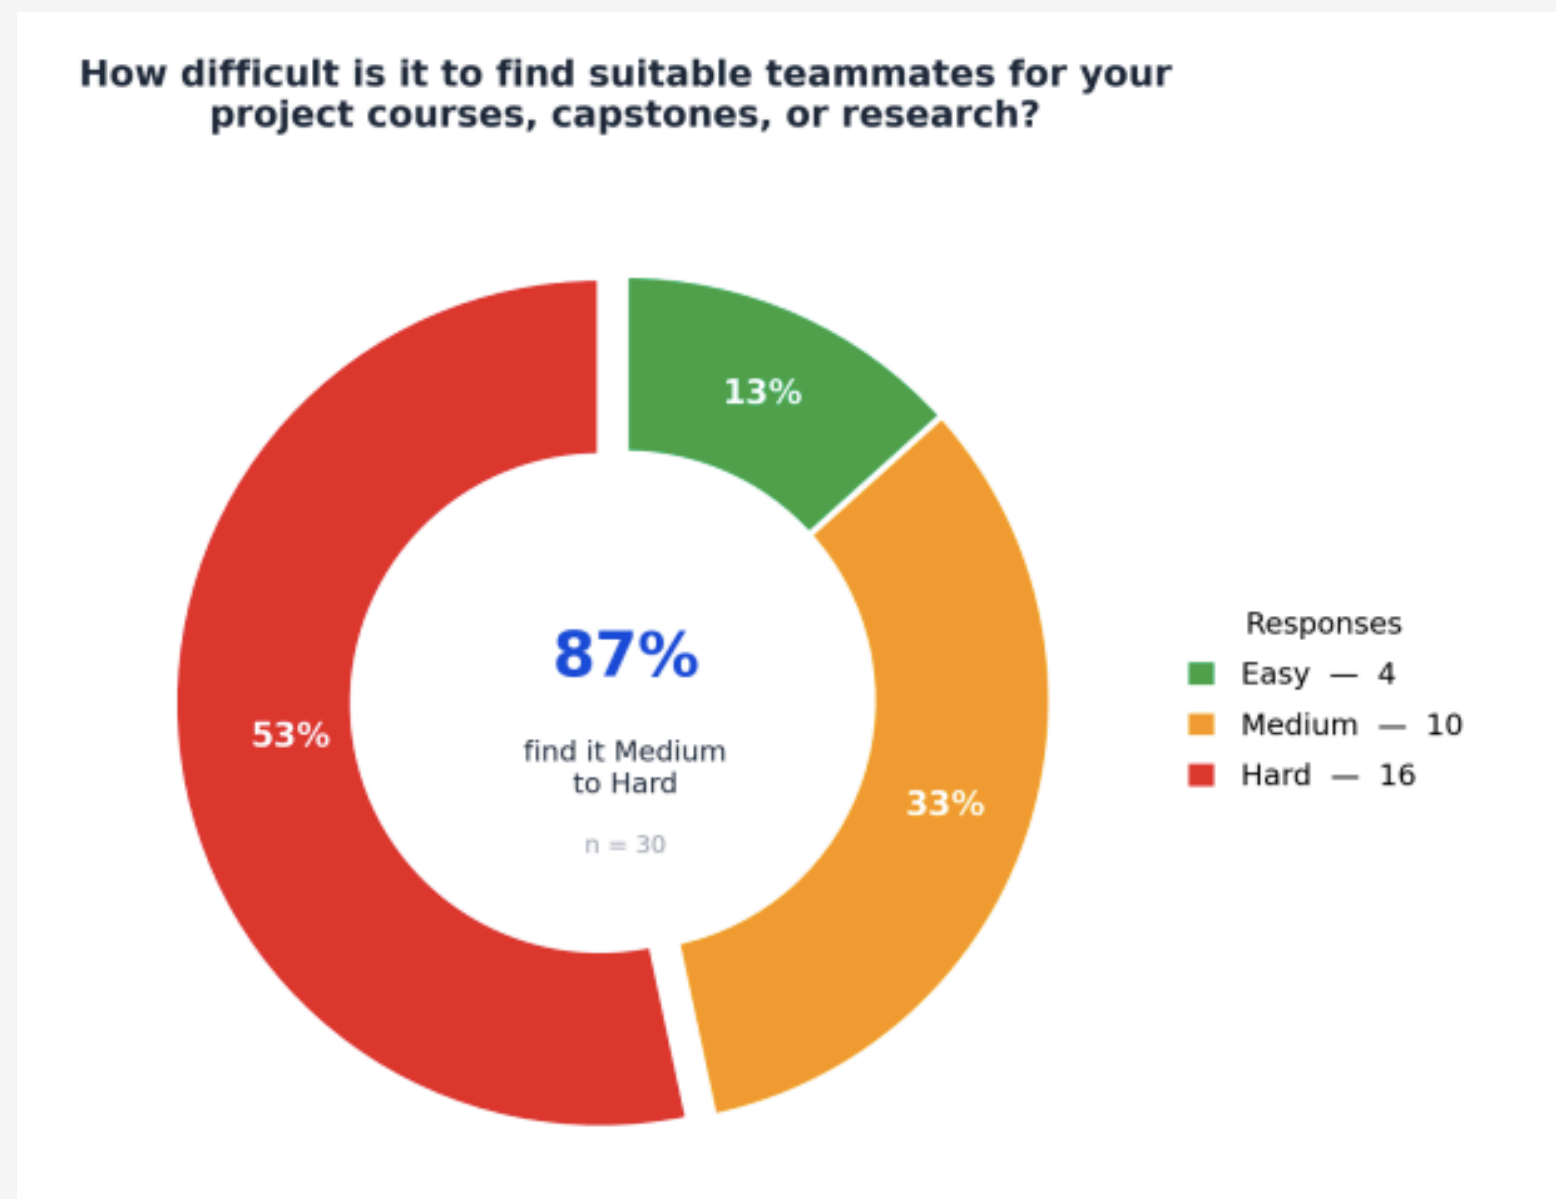

- ▶ Anonymous online survey — 30 respondents
- ▶ Goal: validate the problems and measure real demand
- ▶ Covered five areas:
 - Forming teams and finding teammates
 - Finding and approaching supervisors
 - Collaboration tools and tracking
 - Finding learning / project resources – Hearing about academic events

FINDING TEAMMATES & SUPERVISORS IS HARD

87% find forming a team Medium-to-Hard

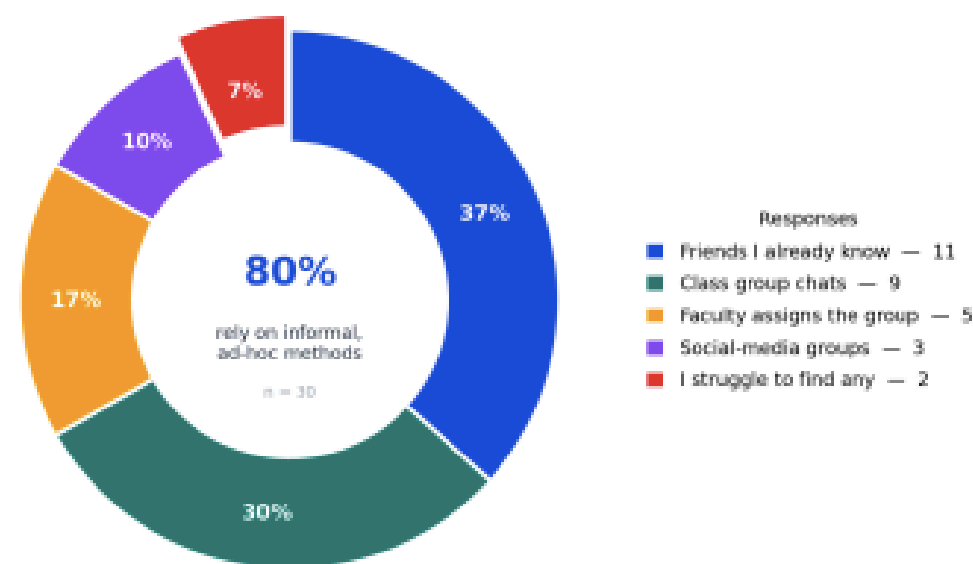

87% say the same about getting a supervisor

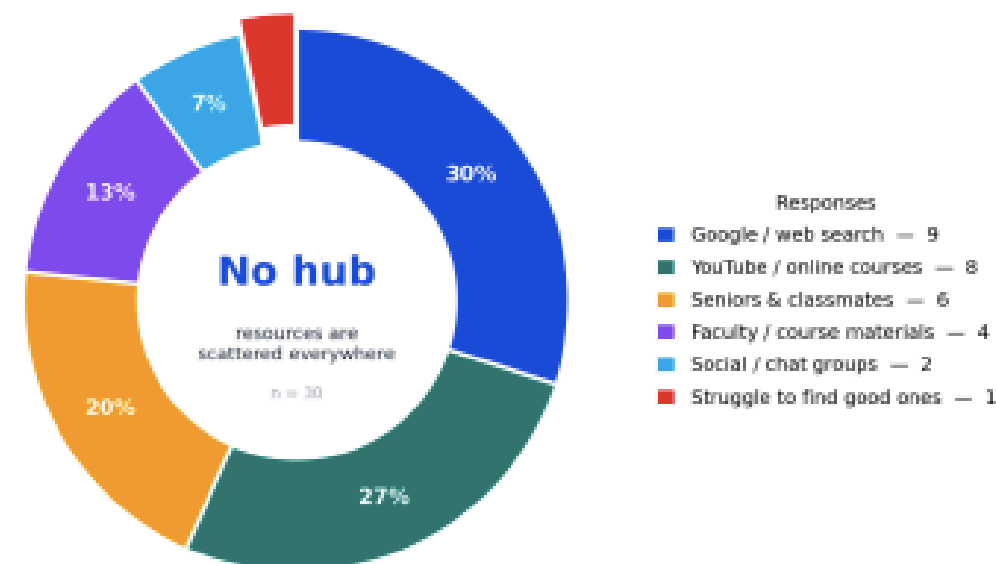

TODAY'S TOOLS & INFORMATION ARE SCATTERED

- ▶ 80% rely on informal methods to find teammates
- ▶ Resources spread across Google / YouTube / seniors — no shared hub
- ▶ 47% miss events or only hear by word of mouth

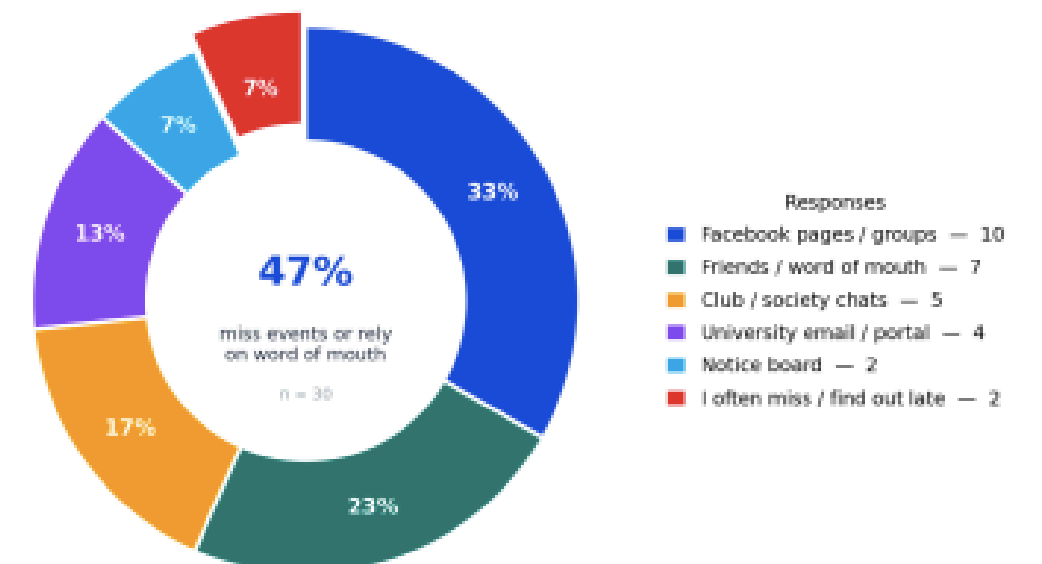

How do you currently find teammates and form project groups?

Where do you currently find learning and project resources?

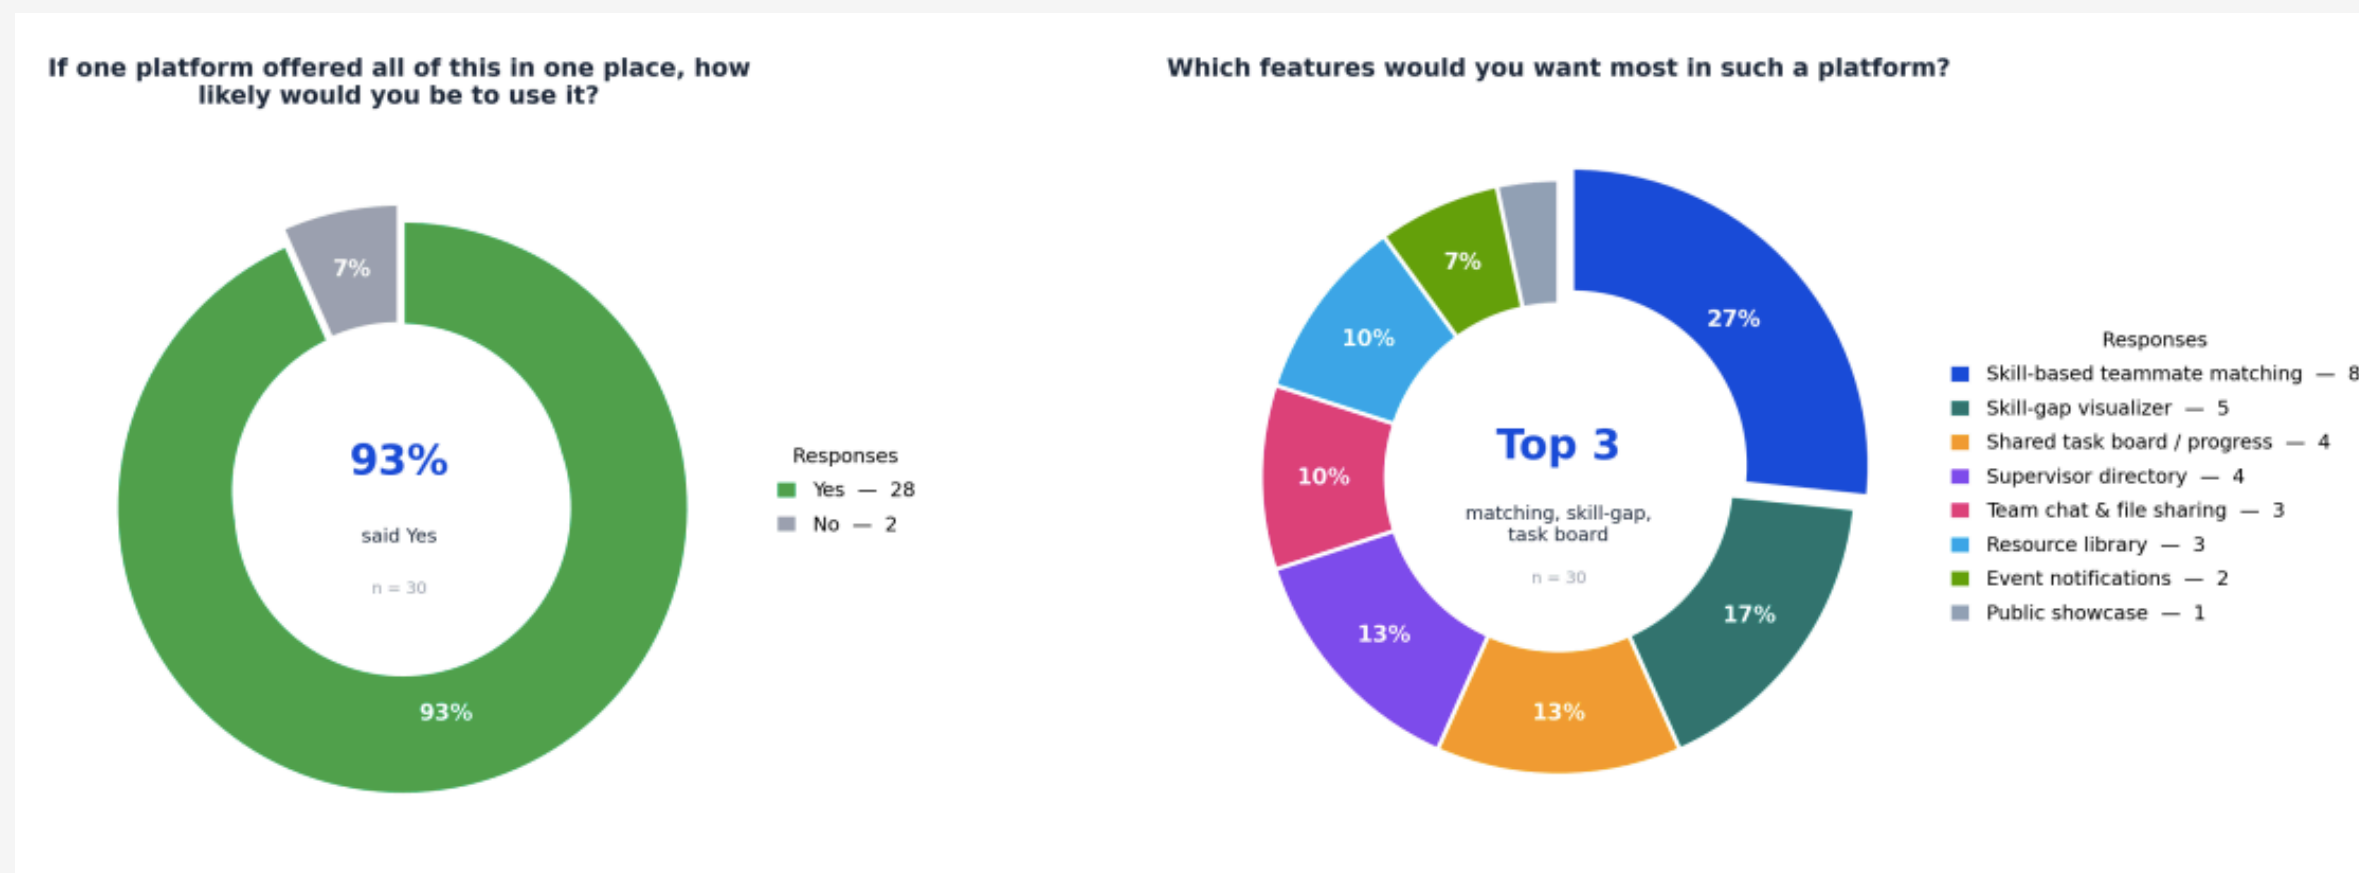

Where do you usually hear about academic events (workshops, competitions, hackathons)?

STRONG DEMAND FOR ONE PLATFORM

- ▶ 93% would use a single platform that does it all

OUR SOLUTION: TEAMUP

- ▶ One platform for the whole project lifecycle:
 - Find skill-matched teammates → secure a supervisor
 - Collaborate in a shared workspace → showcase the result
- ▶ Replaces scattered chats, drives, and notice boards
- ▶ University-only access with verified accounts
- ▶ Built around one core loop: post → apply → accept → collaborate

WHO USES IT

- ▶ **Student** — builds a profile, discovers and forms teams, collaborates, showcases
- ▶ **Supervisor / Faculty** — accepts requests, monitors (read-only), reviews proposals, approves milestones
- ▶ **Administrator** — verifies accounts, moderates content, manages departments & sessions
- ▶ **Guest** — can view the public project showcase only

CORE FEATURES

- ▶ *Discovery board: post, search, filter, apply*
- ▶ *Skill-matched team formation*
- ▶ *Skill-gap visualizer*
- ▶ *Supervisor directory + request workflow*
- ▶ *Workspace: task board, files, milestones, progress*
- ▶ *Proposal tracker (Draft → Approved)*
- ▶ *Resource sharing + event notifications*
- ▶ *Public showcase + PDF export*

FUNCTIONAL REQUIREMENTS (12)

- *Accounts & Profiles*
 - *Registration, Login, Profiles*
- *Team Formation*
 - *Discovery, Matching, Invitations*
- *Supervision (FR7–8)*
 - *Requests, Capacity, Proposals*
- *Collaboration*
 - *Tasks, Milestones, File Sharing*
- *Completion & Admin (FR11–12)*
 - *Showcase, PDF Export, Administration*

NON-FUNCTIONAL REQUIREMENTS

- *Security – RBAC, hashed passwords, HTTPS, JWT authentication*
- *Performance – Page load time < 3 seconds, real-time updates*
- *Usability – Responsive design, easy to use without training*
- *Scalability – Supports 500+ concurrent users*
- *Availability – 99%+ system uptime*
- *Data Integrity – Permanent records and daily backups*

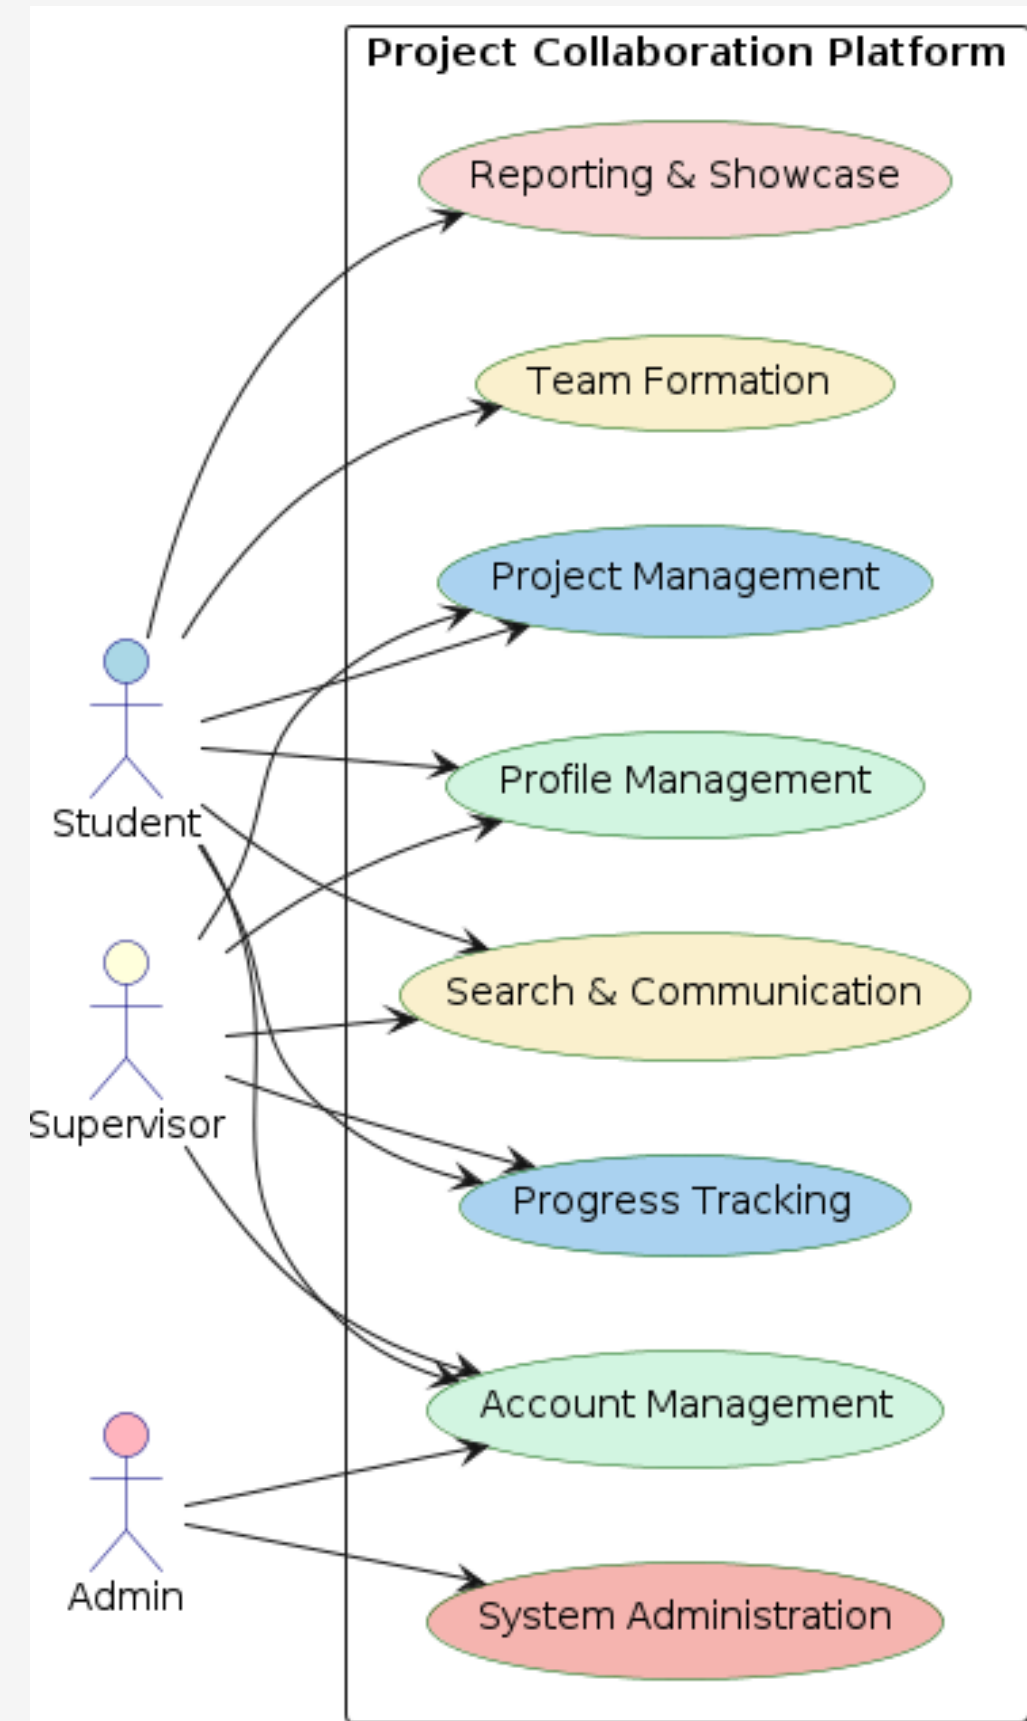

HOUSE OF QUALITY (QFD)

Customer Requirements (CRs)	Technical Requirements (TRs)	Relationship
Students need a simple way to find and connect with suitable teammates	Build searchable profile directory with filters for skills, domain, and availability	Strong
Students need to discover and approach supervisors based on availability and domain	Build searchable profile directory with filters for skills, domain, and availability	Strong
Teams need an organised workspace to manage tasks and track project progress	Implement a task board with type-tagged tasks, priority levels, and status tracking	Strong

USER INTERACTION

- Students create profiles and form teams
- Supervisors review requests and approve proposals
- Administrators manage users and platform data
- System supports end-to-end project lifecycle management

ACTIVITY DIAGRAM

01

Teams draft and submit proposals to supervisors for approval

02

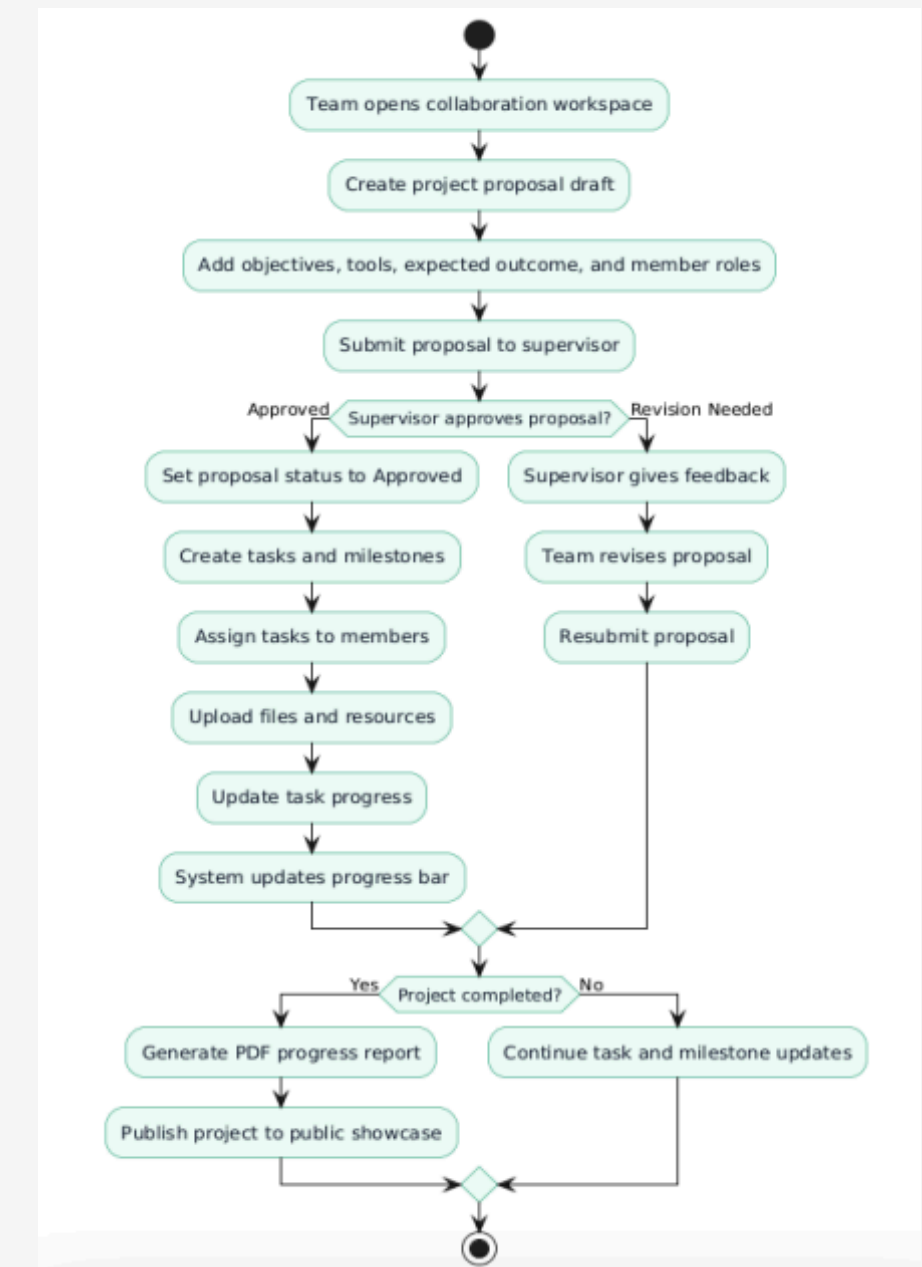

Supervisors provide feedback or request revisions

03

System automatically updates progress bars as tasks are completed

04

Finalized projects trigger PDF exports and public gallery publishing

SEQUENCE DIAGRAM

01

Team leaders search for students matching specific skill profiles

02

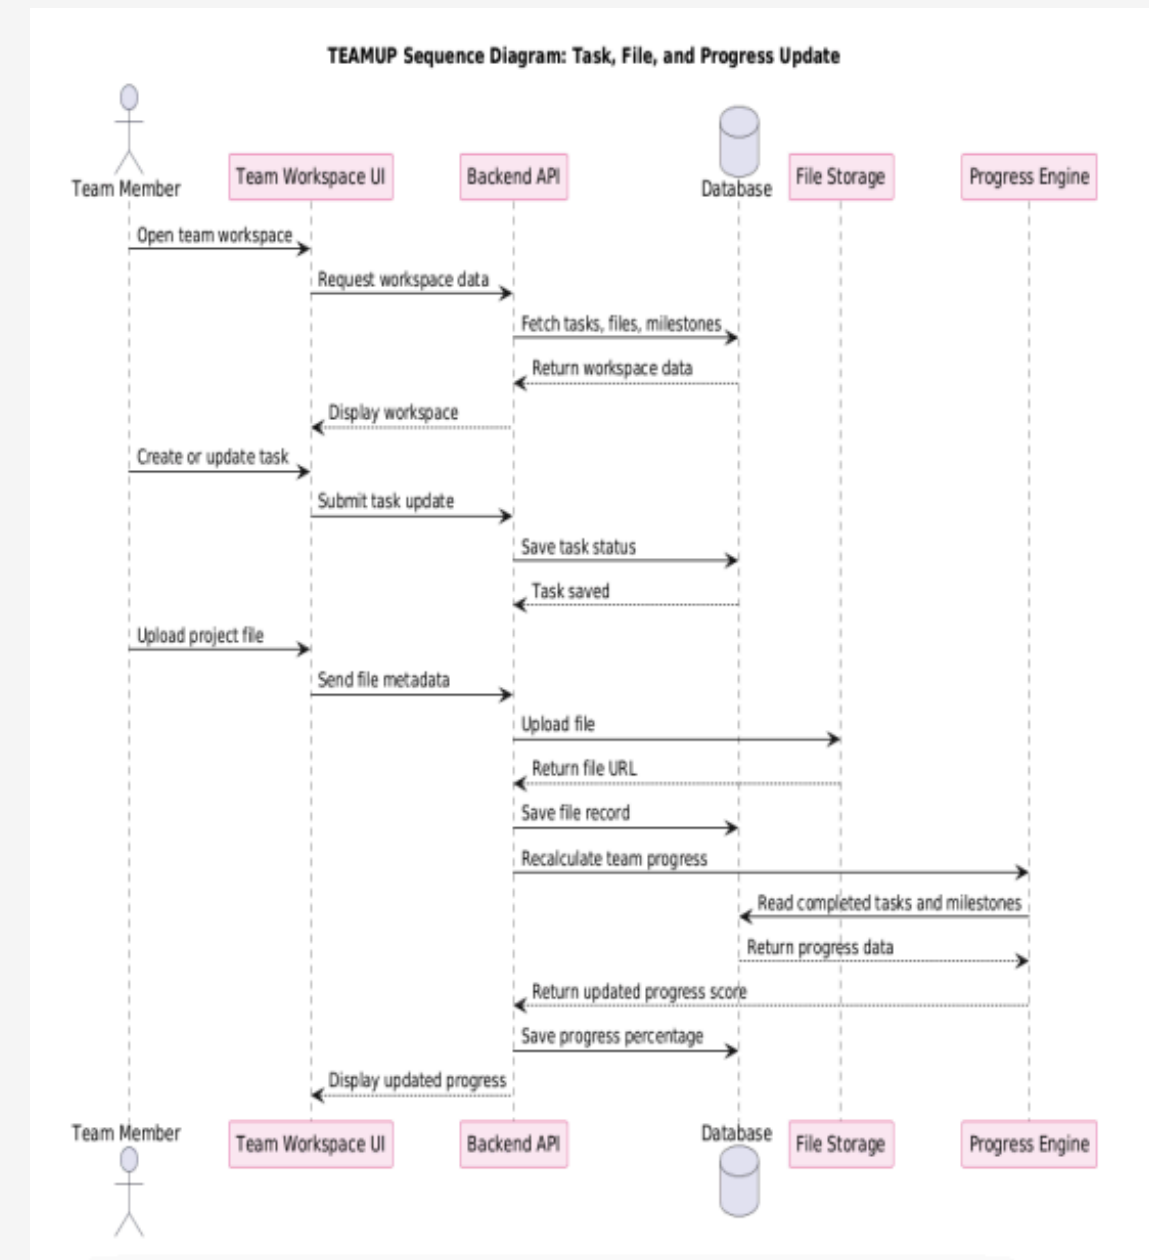

The system sends real-time notifications for pending invitations

03

Accepting an invitation automatically updates the team database

04

Rejections are recorded and notified back to the team leader

FUTURE ENHANCEMENTS EXPAND PLATFORM VALUE

Dedicated Android and iOS mobile applications

GitHub integration for technical repository
managemen

AI-based teammate and supervisor
recommendations

Analytics, peer evaluation, and video meeting
support

CONCLUSION

- TEAMUP — web platform for project team formation, supervision & collaboration
- Skill-based teammate matching, skill-gap analysis, task boards, proposal tracking, showcases
- Centralized workspace replacing scattered tools
- Improves transparency, workflow & coordination
- Builds permanent student portfolios

THANK YOU
